Transformative Education
for Health Professionals

Background

What is transformative education? Transformative scale-up is a process of **sustainable education system and health systems reform** that addresses the **quantity, quality and relevance** of health workers in order to increase access to health service and to improve population health outcomes. It aims to support and advance the performance of country health systems so as to **meet the needs of individuals and populations** in an **equitable and efficient** manner.

In November 2013, the WHO published its guidelines on ‘Transforming and Scaling Up Health Professional Education and Training’ as part of a broader strategy to improve the quality of health professional education. Furthermore, in order to implement the provisions of the World Health Assembly Resolution 66.23 entitled “Transforming Health Workforce Education in Support of Universal Health Coverage,” WHO has also established a technical working group to develop a health workforce assessment tool and also a web platform for its work on transformative health workforce education (www.whoeducationguidelines.org).

Posting a case study for the WHO Transformative Education

interactive map

What is a case study?

- A case study is an account of an activity, event or problem that contains a real situation and highlights the complexities that you would encounter in the workplace or project implementation.
- Case studies are used to help you see how the complexities of real life influence decisions, learn from and share your experiences and support continuous improvement.
- On the WHO transformative education website we have also included options to include your social media sites, voting and commenting by other registered users.
- Ø Our aim is to establish a global resource to i. document country experiences and examples of transformative education, ii. highlight examples of good / best practice and facilitate and empower the sharing and exchange as well as networking.
- Ø Case studies on the WHO TE website interactive map contribute to WHO technical support to Member States in formulating and implementing evidence-based policies and strategies in order to strengthen and transform their health workforce education in support of universal health coverage.

How to upload and submit a case study

You must register with our website to submit a case study.

- **Step 1:** Go to the website <http://whoeducationguidelines.org>
- **Step 2:** Click on CASE STUDIES in the main menu and click on ADD CASE STUDY. This will take you to the case study submission page. See screenshots below.

Navigation:

Upload case study form:

The screenshot shows the 'Create Case study' form. It includes the following fields and elements:

- Project title ***: A text input field.
- Authors ***: A text input field with a character count: 'Characters limited to 150 characters, remaining: 150'.
- Short project description ***: A large text area with a character count: 'Characters limited to 700 characters, remaining: 700'.
- Text format**: A dropdown menu set to 'Plain text'.
- Full project description ***: A large text area with a character count: 'Characters limited to 4000 characters, remaining: 4000'.
- Text format**: A dropdown menu set to 'Plain text'.
- Image**: A section for uploading related documents.

- **Step 3:** fill in the CREATE CASE STUDY page with the following entries:
 - **Project title / Author** (Content limited to 150 characters)
 - **Short project description** (Content limited to 700 characters)
 - **Full project description** (Content limited to 4000 characters)
 - **Geo-location / Image file / Additional documents / Facebook Link / Twitter**
 - **Link / Indicators** (Quality, Quantity, Relevance, Sustainability) / Evaluation

- **Step 4:** Complete your entries and submit. A moderator will then review your submission before posting on the map. This process will take 3 – 5 working days.

See below where elements will be placed on your case study page:

The screenshot shows a case study page titled "Caring for Communities: Training Clinical Associates in South Africa" by Sanele Ngcobo and Nadia Cobb MS, PA-C. The page includes a short description, a full project description, a location map, an image of a healthcare worker with a child, and a voting section.

Callout boxes and their corresponding elements:

- Title:** Points to the main title "Caring for Communities: Training Clinical Associates in South Africa".
- Author(s):** Points to the author information "Sanele Ngcobo, Nadia Cobb MS, PA-C".
- Short description:** Points to the introductory paragraph of the case study.
- Location on the world map:** Points to the map showing the location of the project in South Africa.
- Full description:** Points to the "Full project description" section.
- Link / indicators:** Points to the "Key policy areas", "Recommendation area", "Thematic area", and "Case study addresses" sections.
- Voting results:** Points to the "YOUR REACTION" section showing the number of votes for each response.

YOUR REACTION

STRONGLY AGREE	AGREE	DON'T CARE	DISAGREE	STRONGLY DISAGREE
